

teleray.visit

Be in any room at any time
Compliant, secure, consultation from anywhere

Powerful video and communication platform to view and consult multiple rooms simultaneously or separately. Allows for overview of ultrasound rooms or any other modality that have access to a browser and internet capability. Upon log-in, user chooses which room to view. An encrypted connection is made and will display accepted connections in a grid style view. Clicking a view expands the image to a full screen. There is only a connection when accepted which save bandwidth usage. The platform detects usage and will shut down automatically when not in use. Two way audio communication is network enabled.

- Integrated Support
- Any modality
- Real time viewing
- Teaching tool
- Quality control

“This has been an invaluable training tool for a site. I can train 10 sonographers at once.”

Clinical Professional

Who says you can't be in more than one place at one time?

Great for training and oversight of multiple rooms. Excellent resolution while streaming of sharing images.

- HIPAA compliant and FDA registered with advanced encryption architecture
- Custom Features available for large institutions
- Works with all TeleRay products
- Do more with less time
